- ✓ CSS/SASS/Media-queries
- ✓ Bootstrap 4/ Material-UI 5
- ✓ JavaScript/JQuery/JSON/EJS
- ✓ ReactJS/Redux/Redux-thunk
- ✓ NodeJS/Express.JS/REST APIs
- ✓ Basic Go Programming
- ✓ Google Firebase/OAuth
- ✓ MySQL /MongoDB
- ✓ MS Office/Google Workspace

PROJECTS

1. Glee Fashion Mart: a complete e-commerce website for apparel
A complete e-commerce website based on react, react-redux, react-router-dom, firebase (firestore+auth) and other related packages.
Live URL: glee-fashion-mart-bd.netlify.app
Source: github.com/zakaria-akash/glee-fashion-mart-e-commerce

2. Morning Cafeteria: a responsive website for a restaurant
A responsive website design with the most popular front-end UI framework Bootstrap (version 4). Some related packages are also implemented to make this website more effective such as bootstrap-social, font-awesome, node-sass, onchange, parallelshell and so on.
Live URL: morning-cafeteria-bd.netlify.app
Source: github.com/zakaria-akash/morning-cafeteria-website-design

3. BDHost Ltd.: a responsive website for a web-hosting company
A responsive website design using only HTML and CSS – no framework. Basic to advanced CSS properties are used here to achieve the responsive design pattern. Still in progress, some more advanced CSS properties like transitions & animations will be applied soon.
Live URL: bdhost-bd.netlify.app
Source: github.com/zakaria-akash/bdHost-responsive-website-design

4. Fire Island: a complete react web application for a restaurant
This project is a comprehensive approach to develop a responsive website for a restaurant in the React framework eco-system. Also Bootstrap 4 for the frontend UI design and Redux Core to achieve the Flux like architecture for the entire application's state management are applied here. This project is still in progress and has not been deployed yet.
