## 👤 About Me

I'm a **Full-Stack Web Developer** from Dhaka, Bangladesh with a passion for building clean, efficient, and user-centered web applications. With a CS degree and solid industry experience across multiple companies, I craft scalable digital solutions that make a real impact.

- 🏢 **Currently:** Full Stack Web Developer @ **Care Bangla Ltd.** (June 2026 – Present)
- 🎓 **BSc in Computer Science & Engineering** — University of Liberal Arts Bangladesh (CGPA: 3.92)
- 💡 Passionate about **React.js, Next.js, Node.js, MongoDB** and modern full-stack architecture
- 🏠 Owing a **healthcare platform** end to end — APIs, data modelling, design system, CMS & technical SEO
- 🌐 Enterprise experience with **Bubble.io** no-code/low-code platform (France & BD clients)
- 🤖 Exploring **n8n** for intelligent workflow automation

## 💼 Work Experience

### ● Full Stack Web Developer

June 2026 – Present

Care Bangla Ltd. · Dhaka, Bangladesh

- Own the architecture and development of the company's **healthcare platform** end to end, across the **Next.js/React** frontend, **Node.js** API layer and **MongoDB** data tier
- Design and evolve the **database schema and domain models** — indexing, aggregation queries, file storage and backward-compatible migrations that preserve existing production data
- Build and maintain **server-side APIs and business logic** for service bookings, orders, recruitment workflows and third-party integrations, with request validation, authentication and **role-based access control**
- Develop and extend the frontend **component library and design system**, delivering responsive, accessible and **bilingual** interfaces across all breakpoints
- Maintain the **in-house CMS** so non-technical staff retain full control of public content, media and page configuration without developer involvement
- Own **technical SEO and site performance** — structured data, metadata, canonicalisation, redirects, sitemaps and **Core Web Vitals** — safeguarding search rankings as the platform grows
- Deliver new features and integrations through the **full lifecycle**, from technical design and implementation to deployment, production support and documentation

### ● Junior Full-Stack Developer

Jan 2026 – May 2026

Betopia Group Ltd. · Dhaka, Bangladesh

- Dynamic & responsive front-end development using **React.js / Next.js**
- Robust back-end & REST API implementation using **Node.js / Express.js**
- Close collaboration with UI/UX designers for seamless user experiences
- Write clean, maintainable, and well-documented code
- Debug, troubleshoot, and resolve technical issues efficiently

### ● Software Engineer

Aug 2025 – Dec 2025

King Digital Recharge Ltd. · Dhaka, Bangladesh

- Built and maintained responsive web applications using **React.js, Next.js & Spring Boot**
- Implemented state management with **Redux Toolkit & Context API**; integrated REST APIs for scalable, data-driven apps
- Developed and maintained reusable UI components leveraging **Bootstrap & Tailwind CSS**

## Frontend Developer — Remote

Jan 2025 – Jun 2025

Hiscale · Paris, France

- Designed, developed, and automated large-scale web applications using the **Bubble.io** platform
- Delivered:** **app.hiscale.ai** — Enterprise digital marketing & campaign management SaaS

## Junior Software Engineer

Jan 2023 – Feb 2024

OloBird

- Designed, developed, and sustained web applications utilizing the **Bubble.io** platform
- Delivered:** **olobird-002.bubbleapps.io** — Company public website

## Featured Projects

### Care Bangla

Full-Stack Healthcare Operations Platform · Professional

Bilingual (EN/BN) healthcare platform unifying a public site, care-service bookings, medical-equipment commerce, a customer portal and a self-built staff CMS — all sharing **one domain model, media system and auth boundary**.

[Live Site](#) [Case Study](#)

Next.js 16 React 18 MongoDB RTK Query GridFS

### RapidMart

Real-Time B2B/B2C Commerce Platform

A high-frequency, event-driven commerce platform pairing consumer retail speed with industrial procurement logic — **WebSocket** price/stock ticks, an **RFQ negotiation engine**, tiered pricing and Stripe Payment Intents.

[Live Demo](#) [Source Code](#)

Next.js 16 React 19 TypeScript MongoDB Stripe

### Betopia PulseGrid

Corporate CMS & Live-Chat Platform · Professional

Corporate platform for an energy & supply-chain business: marketing site, MongoDB-backed CMS with a section-based page editor, contact inbox, managed media and a persistent two-way live-chat channel.

[Live App](#) [Case Study](#)

Next.js 16 React 19 MongoDB GridFS Tailwind v4

### Fashion Mart

High-Fidelity Apparel Marketplace

A production-ready fashion storefront with dual-layer authentication, an isolated admin inventory portal, guest→user cart/wishlist merging, **GridFS** image streaming and an automated data-sync pipeline.
